OMB No. 2050-0190 Expiration Date: 5/31/2009

ENROLL US

We Want to Be a Partner in EPA's National Partnership for Environmental Priorities

Name of Organization: Smart Modular Technologies	Facility Name: Aguada Site		
Principal Contact: <u>Jose R. Rodriguez</u>	Title: Facilities & Environmental Engineer Title:		
Authorizing Official:			
Address: Road 115, km. 22.6, POB 1441	City/State/Zip: Aguada, PR 00602		
Phone/Fax: (787) 252-0500, ext. 2084 / (787) 252-0550	Email: jose.rodriguez@smartm.com		
EPA RCRA ID Number: PRR000014696	Date: <u>8/22/06</u>		
PARTNER AGREEMENT			
	onal Partnership for Environmental Priorities. Our goal is to reduce the		
	ir products, processes, or releases using techniques such as source		
	in this enrollment application, we identify one or more voluntary goals		
that we believe we can achieve as partners in this program. The voluntary goal(s) provided below is an initial estimate and may change over time. We may revise our goal(s) or withdraw from the program at any time. If/when we choose to revise our goals or withdraw from the program, we will notify EPA.			
		GOAL #1. Chemical Name: Lead	CASRN: 7439-92-1
Narrative description of proposed project: We produce printed circuit boards. We plan to reduce lead by replacing our current lead-bearing solder paste with a lead-free alloy. We also plan to request lead-free components and parts from our vendors. How we will measure success:			
		110w we will illeasure success.	
		We will measure success by comparing the amount of lead in	our products before and after the project
		We will measure success by comparing the amount of lead in	our products before and after the project.
We will measure success by comparing the amount of lead in	our products before and after the project.		
We will measure success by comparing the amount of lead in o			
We will measure success by comparing the amount of lead in or la. Our voluntary source reduction goal for Chemical #1 is to r	educe the amount of this chemical generated/used from a baseline		
We will measure success by comparing the amount of lead in or a mount of _6,400 pounds in December, 2004 (months)			
We will measure success by comparing the amount of lead in or a lead i	educe the amount of this chemical generated/used from a baseline		
1a. Our voluntary source reduction goal for Chemical #1 is to r amount of6,400 pounds inDecember, 2004 (mon byDecember, 2006 (month/year). 1b. To accomplish this goal, we will use the following source re	reduce the amount of this chemical generated/used from a baseline anth/year) to a reduced amount of pounds generated/used duction options (check all that apply):		
1a. Our voluntary source reduction goal for Chemical #1 is to r amount of6,400 pounds inDecember, 2004 (mon byDecember, 2006 (month/year). 1b. To accomplish this goal, we will use the following source re	reduce the amount of this chemical generated/used from a baseline anth/year) to a reduced amount of pounds generated/used duction options (check all that apply):		
1a. Our voluntary source reduction goal for Chemical #1 is to r amount of6,400 pounds inDecember, 2004 (mon byDecember, 2006 (month/year). 1b. To accomplish this goal, we will use the following source re	reduce the amount of this chemical generated/used from a baseline anth/year) to a reduced amount of pounds generated/used duction options (check all that apply):		
We will measure success by comparing the amount of lead in order to be a mount of _6,400	educe the amount of this chemical generated/used from a baseline nth/year) to a reduced amount of pounds generated/used duction options (check all that apply): X Process or procedure modifications. X Substitution of less toxic raw materials.		
We will measure success by comparing the amount of lead in order to be a mount of _6,400	educe the amount of this chemical generated/used from a baseline anth/year) to a reduced amount of		
1a. Our voluntary source reduction goal for Chemical #1 is to r amount of6,400 pounds in December, 2004 (more by December, 2006 (month/year). 1b. To accomplish this goal, we will use the following source re X Equipment or technology modifications X Reformulation or redesign of products X Reformulation or redesign of products Y Cherch (describe): Other (describe): Y	duction options (check all that apply): X Process or procedure modifications. X Substitution of less toxic raw materials. X Improvements in maintenance/housekeeping practices.		
1a. Our voluntary source reduction goal for Chemical #1 is to r amount of6,400 pounds in December, 2004 (more by December, 2006 (month/year). 1b. To accomplish this goal, we will use the following source re X Equipment or technology modifications X Reformulation or redesign of products X Reformulation or redesign of products Y Details in inventory control Y Details in inventory control Y	duction options (check all that apply): X Process or procedure modifications. X Substitution of less toxic raw materials. X Improvements in maintenance/housekeeping practices. Dur voluntary recycling or recovery goal for Chemical #1 is to		
We will measure success by comparing the amount of lead in or amount of 6,400 pounds in December, 2004 (more by December, 2006 (month/year). 1b. To accomplish this goal, we will use the following source re X Equipment or technology modifications. X Reformulation or redesign of products. Improvements in inventory control. Other (describe): 2a. In addition to, or in lieu of using source reduction methods, of increase the recycled or recovered quantity of this chemical from	duction options (check all that apply): X Process or procedure modifications. X Substitution of less toxic raw materials. X Improvements in maintenance/housekeeping practices. Dur voluntary recycling or recovery goal for Chemical #1 is to a baseline amount of pounds in pounds in		
1a. Our voluntary source reduction goal for Chemical #1 is to r amount of 6,400 pounds in December, 2004 (more by December, 2006 (month/year). 1b. To accomplish this goal, we will use the following source re X Equipment or technology modifications. X Reformulation or redesign of products. Improvements in inventory control. Other (describe):	duction options (check all that apply): X Process or procedure modifications. X Substitution of less toxic raw materials. X Improvements in maintenance/housekeeping practices. Dur voluntary recycling or recovery goal for Chemical #1 is to a baseline amount of pounds in pounds in		
1a. Our voluntary source reduction goal for Chemical #1 is to ramount of 6,400 pounds in December, 2004 (more by December, 2006 (month/year). 1b. To accomplish this goal, we will use the following source re X Equipment or technology modifications. X Reformulation or redesign of products. Improvements in inventory control. Other (describe): 2a. In addition to, or in lieu of using source reduction methods, of increase the recycled or recovered quantity of this chemical from (month/year) to an increased quantity of pounds leading to the describe of the pounds leading to the pounds	duction options (check all that apply): X Process or procedure modifications. X Substitution of less toxic raw materials. X Improvements in maintenance/housekeeping practices. Dur voluntary recycling or recovery goal for Chemical #1 is to a a baseline amount of pounds in		
1a. Our voluntary source reduction goal for Chemical #1 is to ramount of 6,400 pounds in December, 2004 (more by December, 2006 (month/year). 1b. To accomplish this goal, we will use the following source re X Equipment or technology modifications. X Reformulation or redesign of products. Improvements in inventory control. Other (describe): 2a. OMB No. 2050-0190 piration Date: 5/31/2009

Expiration Date: 5/31/2009 SUPPLEMENTAL GOAL SHEET: NATIONAL PARTNERSHIP FOR ENVIRONMENTAL PRIORITIES GOAL # 2 Chemical Name: PCBs CASRN: 1336-36-3 Narrative description of proposed project: In the past, we disposed of PCBs as Universal Waste. We recently implemented a program to recycle them. How we will measure success: We will measure success by determining the amount of PCBs recycled and comparing it with the reduction in materials disposed. 1a. Our voluntary **source reduction** goal for Chemical #_____ is to reduce the amount of this chemical generated/used from a baseline amount of _____ pounds in _____ (month/year) to a reduced amount of _____ pounds generated/used by _____ (month/year). 1b. To accomplish this goal, we will use the following source reduction options (check all that apply): Equipment or technology modifications. Reformulation or redesign of products. Improvements in inventory control. Process or procedure modifications. Substitution of less toxic raw materia Improvements in maintenance/house _____ Substitution of less toxic raw materials. _____ Improvements in maintenance/housekeeping practices. Other (describe): 2a. In addition to, or in lieu of using source reduction methods, our voluntary recycling or recovery goal for Chemical # 2 is to (month/year) to an increased quantity of 350 pounds by December, 2006 (month/year). 2b. To accomplish this recycling or recovery goal, we will use the following options (check all that apply): Direct use/reuse in a process to make a product. X Processing the waste to recover or regenerate a usable product. Using/reusing waste as a substitute for a commercial product. Other (describe): ******************* GOAL # 3 Chemical Name: Cadmium CASRN: 7440-43-9 Narrative description of proposed project: In the past, we disposed of nickel-cadmium as Universal Waste. We recently implemented a program to recycle them. **How we will measure success:** We will measure success by determining the amount of cadmium recycled from nickel-cadmium batteries and comparing it with the reduction in materials disposed. 1a. Our voluntary **source reduction** goal for Chemical #_____ is to reduce the amount of this chemical generated/used from a baseline amount of _____ pounds in ____ (month/year) to a reduced amount of _____ pounds generated/used by _____ (month/year). 1b. To accomplish this goal, we will use the following source reduction options (check all that apply): Equipment or technology modifications. Reformulation or redesign of products. Improvements in inventory control. Other (describe): Process or procedure modifications. Substitution of less toxic raw materia Improvements in maintenance/house _____ Substitution of less toxic raw materials. _____ Improvements in maintenance/housekeeping practices. Other (describe): 2a. In addition to, or in lieu of using source reduction methods, our voluntary recycling or recovery goal for Chemical # 3 is to (month/year) to an increased quantity of <u>150</u> pounds by <u>December, 2006</u> (month/year). 2b. To accomplish this recycling or recovery goal, we will use the following options (check all that apply):

Direct use/reuse in a process to make a product.

X Processing the waste to recover or regenerate a usable product.
Using/reusing waste as a substitute for a commercial product.
Other (describe):
